

Table S2 – Median time spent in the ED during baseline, first audit and second audit period

	First audit; minutes			Second audit; minutes	
	January 2020 (n = 131)	April 2020 (n = 77)	Significance; p-value	September 2020; (n = 142)	Significance; p-value
<b>Total time; median (i.q.r.)</b>	131 (96 – 165)	95 (64 – 128)	<0.001	98 (73 – 133)	0.001
<b>Subprocesses</b>					
Entering – first contact with physician	60 (34 – 87)	30 (19 – 44)	<0.001	47 (25 – 63)	<0.001
First contact – start immobilization	45 (23 – 80)	42 (22 – 70)	0.506	35 (20 – 60)	0.019
Start immobilization - leaving	11 (4 – 24)	10 (6 – 16)	0.489	8 (3 – 16)	0.34

Mann-Whitney U test was used to compare time measurements of April to January and September to January. i.q.r., interquartile range;
